

The top management of our organization has adopted following Environmental and quality management policy:

- Compliance with legislation and regulatory requirements,
- Meeting and exceeding the requirements, needs and expectations of customers and other interested parties,
- Increasing customer and employee satisfaction,
- Continuous improvement,
- Risk-based thinking,
- Striving to be the best in the waste management in the country,
- Price competitiveness of our products to international market,
- Cost reduction with selecting suitable technology,
- Continuous updating of equipment and waste management processes,
- Rational use of resources,
- Responsible environmental management,
- Improving the impact of environmental management,
- Reduction of negative impacts on the environment and pollution,
- Continuous improvement of communication and excellent interpersonal relationships.

An integral part of the quality and environmental management policy are the vision and the mission of our organization:

Vision: Becoming the leading Slovenian company in the processing waste containing non-ferrous and precious metals and being a recognizable provider of pure precious metals, silver brazing alloys and silver products in the wider international environment.

Mission: Providing responsible and ecological waste management in order to maintain a clean and healthy environment and at the same time realize the positive economic effects by obtaining secondary raw materials and spare parts for reuse in the industry.
